Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner stated that proposed amendments to the independent method claims would render them allowable if some clauses and phrases were relocated, but the apparatus claims would still not be allowable. For the apparatus claims the examiner suggested Applicant's next response include a declaration showing comparative results with one or more of the arrays in Table II of Thormann et al. Dr. Barone briefly described key aspects of Applicant's invention and along with Miss Sullivan stated that it is not clear that Thormann et al. actually achieved additivity in the responses of the microelectrodes with any of their microelectrode arrays.
